

CLAUDE CODE

Four commands run my working day

In Claude Code, in the order I type them.

1. /d-session

Shows the day: plans, comms, the board, what needs me.

2. /do <plan>

Works one plan: resume, continue or deliver.

3. /pbp

Where this chat is, and what is mine versus yours.

4. /wrap

Closes the session: wrap-up, checks, handover, commit.

The day, in order

01

/d-session to start

02

/do <plan> for each piece of work

03

/pbp when you lose the thread

04

/wrap before you close

A skill is a checklist with a name

Each command runs a saved checklist in the repo.

Comment FLEET

I'll send the command list
