

SPEED TO LEAD

One text kept a client for 2.5 years

Sent in under a minute after a form fill.

Your form emails you. You are on a job.

The email sits for hours.

The first business to reply usually gets the job

The fix: three texts, no more

- 01 Form fill texts the owner in under a minute
- 02 The customer gets a text back too
- 03 One follow-up if nobody replies

Two rules to set first

QUIET HOURS

Set them

DEDUPE

One lead, one text
